

Quality Manager (TÜV) Module 2

The quality management system is designed to improve the performance and the competitiveness of the company or the organisation. The introduction and the maintenance of the quality management system, which corresponds to the standard ISO 9001:2015 requirements is possible only with the assistance of the employees who understand and have a thorough knowledge of the quality management basic principles and the international standard requirements. Due to the changes in the standards, the training centre IQTC in cooperation with a German educational institution TÜV Rheinland Akademie invites all the interested people to seize the opportunity to acquire the qualification “Quality Manager (TÜV)” (profession code 2423 14 according to the LR profession classificatory).
